Dai-ku\*<sup>1</sup> assigns an Apo and notes from each participant the [nr of] words, starts with Apo-I in cel 1, Apo-II in cel 1, Apo-III in cel 1, Apo-I in cel 2, Apo-II in cel 2 ...▶, collects the Apo's afterwards and keeps the score. Participants cannot choose for their own word. Participant with Apo-I chooses the most appealing word in Kolom 1, Participant with Apo-II chooses the most appealing word in Kolom 1, Participant with Apo-III chooses the most appealing word in Kolom 1, Participant with Apo-I chooses the most appealing word in Kolom 2, Participant with Apo-II chooses the most appealing word in Kolom 2 ...▶, *Once the choices of words are made / or when the agreed time has gone by / the amount of marked cells is totalized. The highest score obtains the stake. If all have the same score, the Dai-ku returns the ingredients of the stake to the sources it sprouted from . If two winners emerge the stake is divided in two.*
